

Adding Sites to the Trusted Zone in Internet Explorer 7 and 8

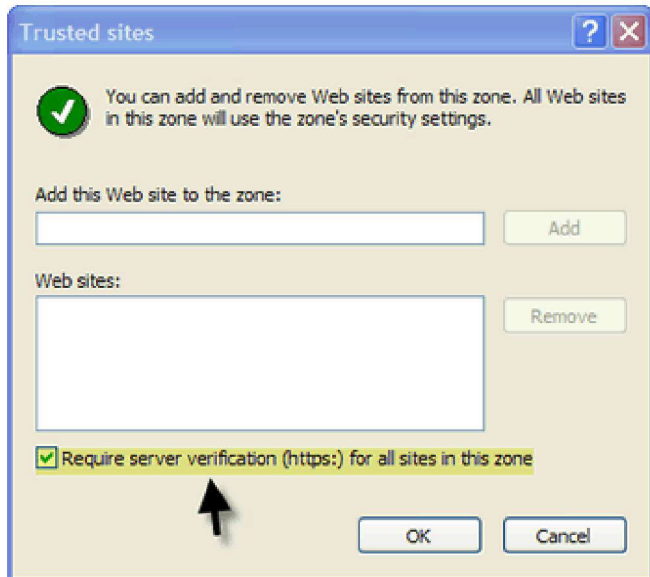

Open Internet Explorer and go to **Tools-Internet Options**.

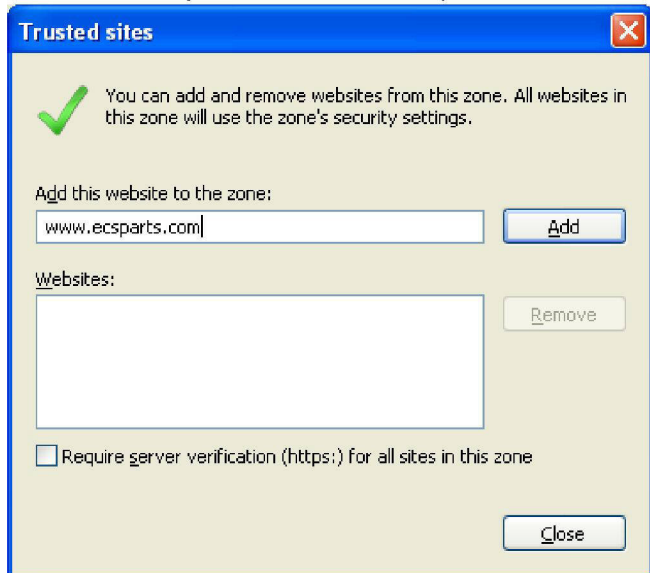

Click the "Security" tab and choose the "Trusted Sites" icon.

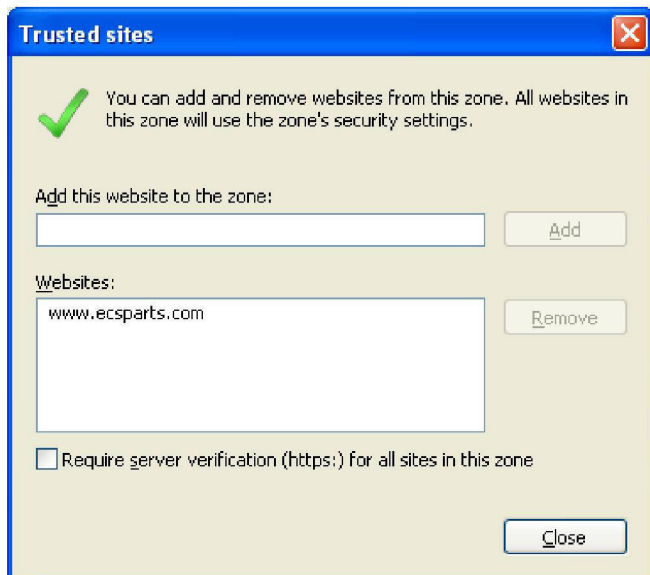

Then click on the button "Sites". A window will open, where you can add any sites that you wish to be in the Trusted zone. Be sure to **remove** the check by the entry "Require server verification (https):..."

Enter **www.ecsparts.com** in the line provided. After entering the site name click the "Add" button.

The site is now added to the list of trusted sites.

There is a "Remove" button (grayed out in the figure above), should you wish to take a site off the list.
